Company Profile

Introduction

Solve solutions is an organisation made up of like-minded individuals and strategic partnerships that aim to SOLVE business challenges using technology. Our main area of focus is assisting our clients to SOLVE problems related to cyber and information security environments.

We are a Managed Cybersecurity Services Provider (MSSP), dedicated to protecting businesses and organisations against the ever increasing number of cyber threats. Our cybersecurity services include Managed SIEM (security incident and event monitoring), VMaaS (Vulnerability Management as a Service), Managed Firewall and Network Security Professional Services.

Our team of highly skilled and experienced cybersecurity professionals use the latest technology and techniques to deliver superior managed services and customised solutions that meet the needs of each of our clients.

Our unique value proposition is to solve the alarming global cyber skills shortage, by growing the capability of personnel and augmenting this with AI and ML.

Core Values

Mission

Our mission is to provide world-class cybersecurity services that protect businesses and organisations from the evolving threat landscape, ensuring that they can operate safely and confidently in the digital world.

Vision

Our vision is to become the leading provider of cybersecurity services, recognised for our innovation, expertise, and commitment to excellence.

Operating Model

Solve solutions is focused on assisting its clients in augmenting their service capability. We have therefore consciously decided not to focus on the sale of products but rather invest in the development of skills, knowledge bases and integrations.

Our preferred channel is through the partner base i.e. system integrators, internet services providers and professional services providers.

Services Overview

We offer a range of cyber security services, including:

Managed Security Information and Event Management (SIEM):

Our SIEM solutions provide real-time monitoring, analysis, and reporting of security events, enabling organisations to quickly detect and respond to cyber threats.

Vulnerability Management as a Service (VMaaS):

We conduct thorough vulnerability assessments to identify and remediate vulnerabilities in your network, applications, and systems. Once we have assessed your environment, we will work with you to build out a vulnerability management program to help you manage and mitigate security gaps in your IT systems and infrastructure.

Managed Firewall:

Our team of experienced cybersecurity experts can keep your network secure by providing implementation and fully managed firewall services to ensure that your firewall stays optimised and effective. We use the latest technology to identify and block potential threats, and we offer round-the-clock monitoring to ensure your network stays safe.

Why Choose Us

Experienced Team:

Our team of cybersecurity professionals have many years of experience and expertise in providing comprehensive cybersecurity services.

Customised Solutions:

We understand that each business and organisation has unique cybersecurity needs. That's why we provide customised solutions that are tailored to meet the specific requirements of our clients.

Cutting-Edge Technology:

We use the latest technology and techniques to deliver world-class cybersecurity services that keep our clients protected against the latest threats.

Proactive Approach:

We take a proactive approach to cybersecurity, working with our clients to identify and remediate vulnerabilities before they can be exploited.

Industries

Our cybersecurity services are tailored to meet the needs of a wide range of industries, including:

- Healthcare
- Government
- Retail and E-commerce
- Finance and Banking
- Education
- Energy and Utilities
